Where art and science collide.

At the Florida State University College of Arts and Sciences, students can harness the collaborative power of various disciplines to spur groundbreaking discoveries. From biology and psychology to English and religious studies, our diverse curriculum offers a wide range of educational opportunities to develop a rich appreciation of the humanities and natural sciences. As the largest college at FSU, with 89 degree offerings, 18 departments and 14 programs, including prominent research institutes and centers, we equipped our undergraduate and graduate scholars with the ability to tailor their paths to meet their individual interests and career goals.

The college's faculty members have earned global recognition for research, teaching and distinguished service—including seven members of the National Academy of Sciences, three Nobel Laureates, a Pulitzer Prize winner, directors of national commissions, university presidents and numerous recipients of other national and international honors.

Clinical Psychology Graduate Program ranks **No. 27** in the nation and **No. 18** among public universities according to *U.S. News & World Report's* "Best Graduate Schools," 2021

2,600 degrees awarded annually

The college created a new interdisciplinary **Data Science** Master's Degree Program to prepare students for contemporary careers in data science, one of the fastest-growing fields in the U.S.
