

# College of Health and Human Sciences

The Florida State University College of Health and Human Sciences addresses global challenges and opportunities related to the physical, behavioral and economic factors influencing the health and development of individuals, families and communities.

The college is comprised of two divisions—Nutrition & Integrative Physiology and Human Development & Family Science—and has a vision to lead nationally through innovative academic and research programs that prepare 21st century professionals.

A degree within Nutrition & Integrative Physiology often serves as a pre-med curriculum
